

One Point Service

One Phone Call Local: 503 968 7964 or Toll Free: 866 808 7964 **One Monthly Billing**

At a lower cost than part-time IT staff, your company can utilize hosted e-mail services, a consistent backup process, and remote managed updates.

- You lower hardware, software, and staff costs;
- Provide for business continuity (disaster recovery);
- Prevent most day-to-day hardware and malware issues.

Hosted Exchange

- You eliminate the server, client access licenses, and IT staff time.
- Hosted, advanced anti-spam and anti-malware protection keeps “the bad stuff” out of your internal network.
- You get superior functionality at less cost.

Managed Backup and Disaster Recovery

Using a comparatively inexpensive on-site device for daily backups, the same device transmits a weekly backup offsite:

- Costs less than backup software, devices, and media.
- More reliable than employees taking a tape home.
- Less costly than a pickup and delivery service.
- Systems restored and usable within hours onto another server.

Managed Services

- Remote monitoring of servers and key workstations—a missed connection results in an immediate trouble ticket to Computeration.
- After-hour service packs, hot fixes, un-installations and rollouts.

Customer Care Focus

- Utilizing SAS 70, Level 2 providers, Computeration staff will set up your Hosted Exchange, Managed Backup, Disaster Recovery, and Managed Services.
- You request the appropriate schedule of service for all non-essential care.
- We respond within 1 business day for essential care.
